

Luis Caceres

Senior Front-End Developer | React, TypeScript, Next.js & Cloud Applications

luiscaceresd97@gmail.com | (506) 226-6351 | [linkedin.com/in/luiscaceresd](https://www.linkedin.com/in/luiscaceresd) | github.com/luiscaceresd | luiscodes.net

Miramichi, New Brunswick

Summary

Senior Front-End Developer and Software Engineer with 5+ years of experience building modern web applications, product interfaces, internal tools, API-driven workflows, and cloud-deployed platforms. Strong hands-on experience with React, TypeScript, JavaScript, Next.js, REST API integration, responsive UI development, component-based architecture, authentication flows, testing, debugging, and production support. Experienced working across frontend, backend, data, and AI-enabled systems, with practical cloud exposure across AWS, Vercel, Cloudflare, Supabase, and Azure. Comfortable contributing to enterprise-style products, improving existing codebases, collaborating remotely with cross-functional teams, and delivering reliable user-facing features in Agile environments. Portfolio available at luiscodes.net.

Core Competencies

React Development • TypeScript • JavaScript • Next.js • Front-End Architecture • Web Applications • REST API Integration • Responsive UI • Component Libraries • State Management • Authentication Flows • Cloud Deployment • AWS Exposure • Git • Testing • Agile Delivery

Targeted Qualifications

Senior Front-End Development: 5+ years building and supporting web applications, customer-facing platforms, internal tools, and business-critical software.

React, TypeScript & JavaScript: Strong experience developing reusable components, typed application logic, API-connected interfaces, forms, dashboards, and production-ready application flows.

Cloud & AWS Exposure: Practical cloud deployment and integration experience across AWS, Vercel, Cloudflare, Supabase, and Azure, including environment configuration, deployment workflows, and application support.

Product Engineering: Able to work from requirements through implementation, testing, rollout, troubleshooting, documentation, and continuous improvement.

Remote Collaboration: Experienced working with stakeholders, technical teams, business users, and product owners in remote and fast-moving environments.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, responsive design, component-based UI, accessibility fundamentals

Application Development: REST APIs, webhooks, authentication flows, forms, dashboards, admin panels, data-driven interfaces

Backend & Data: Node.js, Express, Python, SQL, PostgreSQL, Supabase, Prisma, Drizzle ORM, MongoDB, Redis

Cloud & DevOps: AWS exposure, AWS EC2, Vercel, Cloudflare, Azure, Docker, CI/CD, environment configuration, production deployment

Testing & Quality: Git, GitHub, Vitest, Playwright, Jest, debugging, validation, code reviews, technical documentation

AI & Automation: OpenAI SDK, OpenAI API, Vercel AI SDK, Google AI models, AI agents, workflow automation, n8n

Professional Experience

Software Engineer

Jul 2025 – Present

Guimond Marine Finishers Inc., New Brunswick

saltydna.ca | millenniummarine.ca | Portfolio: luiscodes.net

- Build and support modern web applications, customer-facing interfaces, internal tools, integrations, and AI-enabled workflows using TypeScript, React, Next.js, Node.js, PostgreSQL, Supabase, and cloud deployment platforms.
- Develop reusable frontend components, responsive layouts, API-connected screens, forms, dashboards, and business workflows for ecommerce, customer support, inventory, and operational systems.
- Implement and maintain front-end application logic connected to REST APIs, webhooks, authentication flows, structured data sources, and third-party platforms.
- Designed and implemented customer-facing AI support workflows for saltydna.ca and millenniummarine.ca, improving response consistency and reducing repetitive manual support work.
- Collaborate directly with business stakeholders to clarify requirements, translate operational needs into software features, validate outputs, troubleshoot issues, and improve production systems.

- Support deployment, documentation, testing, bug fixing, and continuous improvement across frontend, backend, cloud, and automation workflows.

Software Engineer

Oct 2023 – May 2025

Lezgo, Remote

- Built and maintained a full-stack web platform from design through deployment, including React/Next.js interfaces, REST API integration, authentication, database-backed features, and production support.
- Developed TypeScript and JavaScript application logic for user-facing workflows, reusable UI patterns, forms, dashboards, and API-connected product features.
- Worked with SQL and relational data models to support reliable application behavior, reporting needs, and business workflows.
- Integrated frontend features with backend services, third-party APIs, authentication flows, and operational data sources.
- Read, extended, and improved an existing multi-language codebase while supporting testing, debugging, documentation, handoffs, and iterative product enhancements.
- Worked directly with stakeholders and end users to refine requirements, resolve workflow gaps, and improve business-critical features in a remote environment.

IT Manager / Developer

Oct 2020 – Oct 2023

HQ Rental Software

- Built and supported internal web tools, admin workflows, integrations, and process automations that reduced manual work by 40%.
- Developed JavaScript-based interface improvements, operational dashboards, data workflows, and API-connected tools to support internal teams.
- Gathered business requirements, documented workflows, translated operational pain points into technical solutions, and supported rollout to users.
- Supported scripting, configuration, troubleshooting, data handling, and integration work across internal software and business systems.
- Used Git-based development practices, testing, documentation, and iterative delivery to maintain and improve internal tools.

Portfolio

Selected front-end, full-stack, and cloud application work is available at luis.codes.net.

Certifications

Microsoft Certified: Azure AI Fundamentals

Cybersecurity — Digital Nova Scotia

Front-End Professional Certificate — Meta

IT Support Professional Certificate — Google

Education

NBCC — Information Technology

Jun 2025

B.Sc. Petroleum Engineering

Sep 2019
